Summary

Generative AI engineer building retrieval-augmented assistants that are measured, grounded and deployed.

Experience

GenAI Engineer — Northwind Analytics, Remote

Feb 2023 – Present

- Built a RAG assistant over 40,000 internal documents with LangChain, FAISS and Azure OpenAI; answer accuracy rose from 61% to 84% on a 300-question evaluation set
- Designed LLM evaluation pipelines (retrieval recall@5, groundedness) and prompts with JSON-schema outputs
- Deployed the services as FastAPI microservices on Azure Kubernetes Service

NLP Engineer — Lumen Health, Leeds, United Kingdom

Jun 2021 – Jan 2023

- Fine-tuned BERT models for clinical named entity recognition (F1 0.89)
- Built a semantic search API with sentence-transformers embeddings and Weaviate

Education

MSc, Computer Science — University of Edinburgh

Sep 2019 – May 2021 · Distinction

Projects

rag-eval-lite (Python, pytest): Open-source retrieval evaluation scripts used by 300+ developers.

Skills

Python, Large Language Models, Retrieval-Augmented Generation, Prompt engineering, Named entity recognition, LangChain, LlamaIndex, FAISS, Weaviate, Hugging Face Transformers, FastAPI, Docker, Kubernetes, Microsoft Azure, Technical writing

Certifications

- Microsoft Certified: Azure AI Engineer Associate (Mar 2024)

Languages

English (Fluent), Tamil (Native)
