Summary

Site reliability engineer automating cloud platforms end to end.

Experience

Site Reliability Engineer — Brightpath Payments, Remote

Apr 2020 – Present

- Provisioned 120+ Amazon Web Services resources declaratively with HCL modules and remote state
- Ran containerised workloads on Amazon's managed Kubernetes service (EKS)
- Built delivery pipelines as GitHub workflows with automated tests and canary releases
- Designed VPC networking: subnets, routing tables, NAT gateways and site-to-site VPN
- Enforced least-privilege access policies and KMS encryption at rest

Systems Engineer — Adria Telecom, Zagreb, Croatia

Sep 2016 – Mar 2020

- Automated Linux server administration with shell and Python scripts
- Led incident post-mortems for the core network platform

Education

BSc, Computer Engineering — University of Zagreb

Sep 2012 – Jul 2016
