Summary

Backend engineer building high-throughput data services in Python.

Experience

Senior Backend Engineer — Klarvik Logistics, Stockholm, Sweden
Jan 2021 – Present

- Designed event-driven microservices in Python (FastAPI) processing 3 million shipments a day through Kafka
- Optimised PostgreSQL queries and data models, cutting report latency from 40 s to 3 s
- Introduced test-driven development and code-quality gates in the CI pipeline

Backend Developer — Nordmark Media, Gothenburg, Sweden
Aug 2018 – Dec 2020

- Built REST APIs with Django and PostgreSQL
- Containerised services with Docker and deployed them on AWS

Education

MSc, Software Engineering — KTH Royal Institute of Technology
Sep 2016 – Jun 2018

Skills

Python, SQL, Microservices, Event-driven architecture, Test-Driven Development, Java (university projects), FastAPI, Django, PostgreSQL, Apache Kafka, Docker, Amazon Web Services, pytest

Languages

Swedish (Native), English (Fluent)
